

Make the Switch to Grodan's Total Solution designed specifically to grow cannabis.

Clean. Control. Consistent.

CLEAN

Grodan growing media is designed to be clean and hygienic from the factory to the grow room

- Clean and easy to handle and use, doesn't break down and clog irrigation systems
- Pest and disease free (basalt rock is melted at 2,700 degrees) thus less plant protection products needed
- Able to re-use drain from the first flush – no tannins, sodium or potassium to leach in the first flush

CONTROL

Grodan's total solutions with stonewool growing media, GroSens and e-Gro are designed to give the grower more control of their cannabis crops

- Better plant balance thus less sensitive to disease
- Better dry back
- Less water usage
- GroSens and e-Gro provide unparalleled insights to your rootzone and critical climate conditions
- Grodan's expert Crop Specialists provide support and guidance combined with Grodan's 50+ years of expertise in precision growing

CONSISTENT

Grodan is designed to be uniform and consistently high quality

- Uniform stonewool fibres and density result in fast, even rooting in and uniform plant development
- More uniform WC and EC distribution over the height of the product so crop development is optimized
- Consistent, uniform plant development is easier to manage from a labour perspective

Pargro

Easy to use growing media

Pargro® is the ideal growing media for indoor growers who are interested in switching from coco or peat. With Pargro, growers who prefer an easy to use substrate can leverage Grodan's 50+ years of excellence in stone wool growing media innovation and the new GroSens 2.2 sensor technology without compromising quality and consistency.
